SocketModem® iCell Intelligent Embedded Cellular Modems

New 3G EV-DO Models for Verizon – Now Available

Date: August 29, 2013

I. Summary

The new SocketModem® iCell intelligent embedded cellular modems are complete, ready-to-integrate communications devices that offer 3G EV-DO performance. These quick-to-market communications devices allow developers to add wireless communication and GPS tracking to products with a minimum of development time and expense. The intelligence of the embedded Universal IP® stack allows for automatic/persistent connectivity for mission-critical applications and enhanced M2M (machine-to-machine) functionality. The SocketModem iCell intelligent cellular modems are based on industry-standard open interfaces and utilize Multi-Tech's [Universal Socket design](#).
